# ABOUT US

The Camden Climate Change Alliance (CCCA) is a partnership network and provides sustainability expertise to businesses and organisations, helping them to realise benefits in improving sustainability practice.

251  
ACTIVE MEMBERS IN 2016

Based in the London Borough of Camden, members make a public commitment to measure, manage and reduce their greenhouse gas emissions and embed good environmental practice in their organisations.

## The CCCA

- ✓ Advises businesses and organisations on opportunities to reduce their environmental impact
- ✓ Provides a certification to organisations improving their environmental performance
- ✓ Creates opportunities for networking and knowledge sharing

Established in 2008 by Camden Council in partnership with organisations committed to tackling climate change, the CCCA now has 251 active members. The mission of the CCCA is to assist members to contribute towards a borough-wide 40% carbon reduction target by 2020 championed by Camden Council.

---

# OUR PEOPLE & PARTNERS

A team of sustainability experts at the CCCA works in partnership with other local networks including Business Improvement Districts (Camden Town Unlimited, BEE London, Euston Town, Fitzrovia Partnership), the Knowledge Quarter, and business forums (Kings Cross Estate Environment Forum and Urban Partners for King's Cross, Euston and St Pancras).

Camden Council currently provides core funding for the CCCA, however since 2016 the CCCA has expanded its consultancy services offer and introduced a new premium membership package with a view to becoming financially independent from the Council. This is in addition to our free membership offer.

## Our Board

The CCCA is overseen by an Advisory Board comprising member organisations. The Advisory Board ensures the needs of the business community are continually met and leads the strategic development of the CCCA.

**“ I am a board member as I want, together with my peers, to assist and steer Camden to tackle climate change in the Borough. CCCA membership will help your organisation learn, measure and manage its carbon footprint. Many organisations want to do the right thing, but find the task daunting. With the help of CCCA, this need not be the case.**

**Rajnika Patel, UCLH**

”

## Advisory Board Members 2016

### Laura Davies

Senior Corporate Responsibility Executive, Oslwang LLP

### Lydia Dutton

Project Manager (Environmental) Argent LLP

### Martin Houghton

Associate Consultant, TBR

### Karen Landles

Behavioural Insights Director, Exterion Media

### Stephen McKinnell (Chair)

Head of Energy Management, SOAS and Bloomsbury Heat and Power Consortium

### Kevin Nunan

Office and Projects Manager, Voluntary Action Camden

### Rajnika Patel

Sustainable Development Manager, UCLH

### Iain Patton

Founder and CEO, Ethical Team

### Mary Rawlinson

Technical Director, Green & Castle

### Simon Ryan

UK Operations Manager, Oslwang LLP

### Stephen Tindale

CEO Climate Answers

### Stephen Wilkinson

Head of Risk and Compliance, Addison Lee

Thank you to all members of the Advisory Board for their input over the past year.

---

# FOREWORD

The last year has been an exciting time for the Camden Climate Change Alliance (CCCA) as it transitions towards a new model of funding.

***Councillor Meric Apak  
Cabinet Member for  
Sustainability  
& Environment***

The CCCA membership as well as the services it delivers has continued to grow as we support organisations to become more sustainable and reduce energy consumption, waste and carbon emissions.

With Camden being home to the second highest number of businesses in London and the fourth highest in the UK, supporting environmentally sustainable economic growth is all the more important.

Our approach to sustainability in supporting businesses in the borough through the CCCA ensures we are able to respond to business needs, assisting them to achieve their carbon reduction targets and sustainability objectives. Through our engagement programme we are able to ensure Camden continues to thrive for businesses and as a sustainable community. Undertaking visits to members recently I was impressed by the fantastic work being done locally.

The CCCA not only assists in working towards the borough-wide emissions reductions target of 40% by 2020 but provides an avenue for challenges such as improving air quality to be addressed which I have made a top priority for Camden.

This Annual Report provides detail on some of the successes in 2016 which I hope you find inspiring for the year ahead as we work together for a better Camden.

---

# STATEMENT FROM THE CHAIR

The CCCA has continued its success in recruiting and assisting its members to become more energy efficient and to reduce their impact on the environment.

**Stephen McKinnell**  
*Chair of the CCCA Advisory  
Board & Head of Energy  
Management, SOAS,  
University of London*

In 2016, this success has led to an impressive 27% borough wide reduction in commercial and industrial emissions since 2008 and 67% of members who provided the data have seen a reduction in their emissions compared to a year earlier. These reductions are all against a backdrop of increasing population and business growth in the borough which is no mean feat.

There are still many challenges out there as we strive to meet our 40% reduction target by 2020 not least that of obtaining good quality data by which we can measure our performance. This is one of many areas where the CCCA can provide assistance to members and I would urge you to look out for and attend the various workshops that the CCCA run throughout the year which are packed with useful advice on this and many other helpful topics to get you on the right track.

Thanks again to all our members for their contribution over the last 12 months. It's not always easy working in our own organisations to reduce emissions but the encouragement and support is out there amongst our members and I would encourage anyone who is not yet signed up to come and join our community to work collectively to help make Camden the greenest and most sustainable borough in the country.

# OUR MEMBERSHIP GROWTH

The CCCA has two types of membership – Basic and Premium. Basic membership provides free point of use services including the online ‘Made Easy’ guides, access to CCCA workshops and the CCCA electronic bulletin. Premium membership was introduced in 2016 and offers additional tailored support and account management.

Our membership consists of a range of organisation sizes, from the micro to international companies and spans a number of different sectors.

Read more about the experience of our premium members in the following case studies. If you would like to become a premium member, please contact us for a free no obligation environmental assessment to find out how we can help your organisation.

---

# MEMBER ACHIEVEMENTS IN 2016

## Carbon reduction reporting

Since we were established in 2008 the CCCA has seen an increase in the number of members and subsequently the proportion of commercial and industrial emissions reported in the borough of Camden.

Members report direct emissions from heating and use of fuel in facilities and assets that the company owns (scope 1) and energy consumption (scope 2) for two benefits:

### 1. Accountability

Annual reporting acts as a catalyst for organisations to become accountable for their direct emissions, which leads to action to manage and reduce them.

### 2. Addressing challenges

The CCCA is able to extrapolate member data and identify trends and challenges that organisations face in managing emissions.

There has been a 27% reduction in borough-wide commercial and industrial emissions since 2008, in the same period the population of Camden has increased by 11.67%. With the localised Gross Value Added estimate also increasing by 35% since 2008 this shows the economic growth in the borough alongside the reduction in carbon dioxide emissions is possible.<sup>1</sup>

This is reflected in the year on year reporting of the CCCA where 67% of members saw a reduction in their carbon footprint in 2016 compared to 2015.<sup>2</sup>

<sup>1</sup> Business and Employment Bulletin

<sup>2</sup> This includes only those members that reported in 2014/15 and 2015/16

*CCCA Members  
High Speed 1 receive their  
Mark of Achievement.*

## Recognising success

The CCCAs Marks of Achievement certification scheme recognises the environmental progress made by our members. There are three carbon management levels:

### Going Green

for organisations that have made a commitment to reducing their environmental impact.

### Cutting Carbon

for when an organisation can show that they are making a difference and have demonstrated clear carbon savings.

### Carbon Champion

for organisations that are a leading example and are helping others achieve emissions reductions.

There is also a separate **Team Green award** to celebrate the achievements of Camden businesses in staff engagement and behaviour change.

## Marks of Achievement awarded

2016	27	32	4	3	66
2015	5	14	4	7	30
2014	2	16	1	1	20
	Going Green	Cutting Carbon	Carbon Champion	Team Green	

# OUR SERVICES

The CCCA continues to provide members with sustainability consultancy services, helping businesses to reduce emissions and wider environmental impact, reduce overheads and increase efficiency in a competitive environment. See our services below and some examples:

## Assessment & Management

### Display Energy Certificates

Our registered assessors can provide Display Energy Certificates for your organisation to comply with regulations. These have been completed for a number of our members' buildings already.

### Carbon Footprinting

Measuring and understanding your organisation's carbon footprint is one of the first steps needed to cut carbon and energy costs – it enables you to measure subsequent savings, and it helps you to identify areas of energy wastage. Using the Government approved methodology CCCA can undertake an analysis for you.

What members say:

### Carbon Footprinting for the Wellcome Trust

The Wellcome Trust is a global charitable foundation that fund medical research and a CCCA member. In 2016 the CCCA undertook a carbon footprint analysis for their iconic buildings in Camden.

**“ The Wellcome Trust is committed to reducing our environmental impact. Whether through reducing the energy footprint in keeping our buildings operational, or how we engage with the wider scientific world across the globe.**

**We engage with both internal departments and external organisations, including Camden Carbon Change Alliance, to share and enhance our knowledge on environmental impacts. Working with the Camden Climate Change Alliance has enabled Wellcome to understand our footprint and legislative requirements to actively measure our environmental impact and seize opportunities to challenge it.** ”

**Kulbir Bhatti, Energy and Environmental Performance Manager, Wellcome Trust**

### Energy and Waste Management Audits

Our energy and waste management audits are conducted on-site so that you can identify areas for further improvements and savings. We use our ISO 50001 and 14001 auditor experience to influence our audits.

What members say:

### Waste Audit for Beck Greener

Beck Greener is a London-based firm of patent attorneys, trade mark attorneys, design attorneys and IP litigators. CCCA has undertaken a waste audit for their building.

**“ The CCCA reviewed our existing waste management practices and identified key areas where we could improve. They provided valuable advice regarding implementation of new practices and methods for monitoring progress and measuring success, and have always been on hand to answer any questions that we may have had.** ”

**James Stones  
Partner, Beck Greener**

### ISO 50001 and 14001 Services

Complying with ISO standards can help you win new business tenders and ensure your environmental management systems are working and continually improving. Whether you need help in applying and obtaining the standard, or wishing to adhere to the standard without certification, or require internal audits to comply with the standards, our expert team can work with you.

---

## Training

### Training and Workshops

We can create bespoke workshops that give your team the skills to manage your environmental impact, rather than doing it for you. It will empower your team, develop its skills and capacity and can also help with staff retention.

What members say:

### Carbon footprint workshop

“ The workshop helped us to understand what goes into working out a carbon footprint and the equations needed to find out the cost saving made by changing technologies, habits and behaviour in the workplace. It would be something we would recommend to any business looking to become more corporately conscious and responsible, both for the finances of their business and the future of the planet. ”

**Workshop attendee**

## Strategic Planning

### Sustainability Pathway and Strategy

A clear route to achieving your sustainability aspirations is a good sustainability strategy. This will reduce costs, provide market opportunities, engage employees, take advantage of policy and enhance your reputation. We can help you to produce the correct strategy for you.

### Sustainability Policy

A good policy will guide your business to cut consumption and waste, increase efficiency, meet standards or legislative requirements, improve your organisation's reputation and ensure you keep up with or lead the market. We can help you develop the correct policy for you.

### Risk Management Assessment

Our environmental risk assessment will give you complete understanding of the regulatory, physical and related risks that poor environmental management poses to the business. This can increase investment in your sustainability strategy, or inform you of preventative actions that you can take to mitigate risks.

### Staff Engagement and Behaviour Change

Our staff engagement assessment will help you to make savings with very little investment in energy efficiency technology. It can also ensure that any initiatives in place work efficiently.

### Business-Case Reports

Our business case reports will help you to make a compelling case for new energy efficiency and carbon reduction projects by quantifying the potential cost savings, direct benefits and indirect quantifiable benefits that you need for project sign-off.

See our website for more examples

# PREMIUM MEMBERSHIP CASE STUDIES

With the introduction of the Premium Membership in 2016, two of our premium members talk about their successes working with the CCCA.

## Optimum

Optimum is a building services management company offering a range of mechanical and electrical building services. Joining the CCCA as a premium member in April 2016, Optimum has benefited from the advice, pro-active support and resources offered including a sustainability pathway and carbon footprint analysis.

Peak performance.  
Because we are  
**Optimum.**

### Key initiatives Optimum is undertaking:

#### Fleet upgrades

- ✓ With the fleet of service vehicles identified as the most significant environmental impact, use is monitored by trackers with real-time geographical display installed for the service desk dispatch teams. This has resulted in more efficient fleet utilisation and optimised travel routes for routine maintenance and reactive call outs.
- ✓ Fleet replacement is due 2017 with reduced carbon and air quality emissions and all vehicles equipped with stop-start technology. 16 Vehicles are currently on order.

#### Energy

- ✓ Smart-meters have been installed at head office to provide detailed analysis of electricity consumption.
- ✓ Working closely with clients on a range of bespoke energy-saving incentives.

#### Staff engagement and management

- ✓ Improved environmental focus within induction process for all new employees; all new employees undertake environmental awareness training.

“ Becoming a Premium Member of the CCCA has helped us in establishing a way forward on our sustainability activities and defining SMART objectives within our environmental management system. It has provided a direction which we presented to senior management to achieve buy in. ”

**Lee Playford**  
**QHSE Manager – Optimum**

- ✓ Buy in from senior management with pro-active review meetings held at 6 monthly intervals with attendance from all Directors.
- ✓ Representatives on the ground who are the environmental champions with bi-monthly QHSE representatives meetings.
- ✓ New ‘We Are Rewards’ hub to communicate topical environmental issues and updates to staff.
- ✓ ISO14001 accredited.

“ The initial meetings were extremely informative and led to useful discussion with respect to our existing policy and procedures. The CCCA provided a sustainability pathway which was presented to senior management as part of the Management Review meeting for the organisation’s ISO 14001 Management System. From analysis of the previous 12 months’ data the CCCA produced a detailed report for Carbon Footprint analysis, information for emissions/FTE, and analysis of our fleet’s utilisation trends.

The report summarised what we were doing well and where our opportunities for improvement existed and thus has provided a useful benchmark in setting future targets within our environmental strategy and the key areas for improvement.

”

**Lee Playford, QHSE Manager – Optimum**

# PREMIUM MEMBERSHIP CASE STUDIES

With the introduction of the Premium Membership in 2016, two of our premium members talk about their successes working with the CCCA.

## The Wesley

The Wesley is recognised as the First Ethical Hotel in the UK and is located near Euston. It has become established as one of central London's fastest emerging independent hospitality and accommodation brands, since its rebranding in May 2013. Building on a rich Methodist heritage dating back to 1950 and beyond, TheWesley attracts guests from around the United Kingdom and the world, for their accommodation, event and conference requirements.

### Key achievements and activities The Wesley are undertaking:

#### Awards and credentials

- ✓ Camden Climate Change Alliance Carbon Champion in 2016.
- ✓ Green Tourism Award since 2012.
- ✓ Social Enterprise Mark since 2010 (the only hotel or conference centre in the UK to receive this award).
- ✓ Working with Investor in People since 2008 (obtained Gold Investor in People in December 2015).
- ✓ Sustainable Restaurant Association Food Made Good Accredited in 2015/16.

#### Staff engagement and management

- ✓ A green team meeting on a monthly basis and create awareness.
- ✓ Buy-in from senior staff and a sustainable ethos that runs throughout the organisation encouraging new ideas to be put forward.
- ✓ ISO14001 accredited since 2012 after working on the programme since 2010 with aim to transition to the new standard.

“ Working with the Alliance provides our company with effective ongoing support and recognition in our objective to achieve the highest sustainable and environmental management standards. ”

**James Barr**  
*Head of Projects – The Wesley*

#### Water and waste

- ✓ Utilising different cleaning methods that are not chemical based to achieve the same result.
- ✓ No food waste to landfill since 2012.

#### Energy and Carbon Footprint reductions

- ✓ Reductions over the last seven years in carbon footprint by turnover, by employee and by customer, showing that the building and the business is now run more sustainably and efficiently.
- ✓ They source energy (electricity and gas) from 100% renewable resources.

“ TheWesley has worked with the CCCA since 2008 on the creation of a new Environmental Policy, setting targets and putting standards and systems in place. We have continued to collaborate ever since and this has helped us to go from strength to strength. Since 2008 The Wesley has reduced their carbon footprint by 21% despite now being busier than ever with customers which has meant eliminating 116 tonnes of CO<sub>2</sub> emissions annually.

One of the benefits of being a member of the Alliance is to meet other companies and organisations from the borough and find out about their best practices and achievements. This is particularly helpful when it includes different sectors, both public and private. It is also positive to receive recognition such as the Carbon Champion award, as it provides a benchmark that we are on the right track.

**James Barr, Head of Projects – The Wesley**

”

# SHARING EXPERTISE & KNOWLEDGE

The CCCA hosts workshops and events on a range of topics including carbon footprinting, staff engagement and behaviour change, waste management and ISO certification. These events and workshops are a great opportunity for organisations to improve their knowledge, network, share experiences and address the latest environmental issues and opportunities.

In 2016, 130 business representatives were engaged through quarterly events and workshops, including:

- ✓ CCCA Re-launch Annual Event
- ✓ Sustainable Procurement Seminar
- ✓ Advanced Carbon Footprinting Workshop
- ✓ Waste Breakfast Seminar and Site Tour

*The CCCA Re-Launch Event brought over 80 CCCA members together to officially present the new CCCA branding, premium membership and service offering as well as celebrate the year's successes and Marks of Achievement.*

*CCCA members attend Carbon Footprint workshop to learn more about their carbon impact.*

*CCCA members visit Alara to learn about their initiatives with waste minimisation.*

Look out for upcoming events on our [www.camdencca.org/events](http://www.camdencca.org/events)
